

Amiad's 5-Minute News Splash

We know your time is valuable, but we have a NEW media product we want to share with you...

Introducing Pep Active:
it can outlast and
outperform traditional
sand media

- An inorganic media which provides accurate and efficient filtration – removes particles down to 2 micron
- Processed to optimize size and provide a unique shape to significantly increase surface area over other media options
- Negatively charged to adsorb organics and small particles
- Design eliminates bio-fouling and channeling and prevents accumulation of material on or in media
- Media service life of up to 15 years
- Up to 50% less water used for backwash
- Self-sterilizing
- No chemical regeneration required
- NSF-61 & NSF-50 certified
- Ideal for dirty water applications

Contact your Regional Sales Manager to see how **Pep Active** can help you.
