

**Amiad's Mini Sigma filter received the
EIRSMX 2019 NEW AND INNOVATIVE PRODUCT AWARD**

Amiad Water Systems Ltd, a leading global producer of water treatment and filtration solutions, presented its new **Mini Sigma filter** for superior water filtration in the irrigation market at this year's **International Sustainable Irrigation Expo (EIRS) in Mexico, April 3-5, 2019.**

The Mini Sigma, which was launched in May 2018, is an innovative automatic self-cleaning filter that is both lightweight and durable with maximum installation flexibility. This new product won the **New and Innovative Product Award** which recognizes the sustainable use of water resources, energy and its services, highlighting the technification and the wide impact due to its originality and social and environmental contribution.

The Mini Sigma is available in three sizes (2", 3", 4") and includes the innovative ADI-P electronic controller offering one-of-a-kind monitoring and control functionality. It interacts with the advanced and user-friendly ADI-P app, providing detailed filtration performance data on your smartphone.

Mini Sigma

- Compact and modular design – small footprint and various installation configurations
- Polymeric filter – corrosion-free
- Low water and energy consumption for backflush
- Designed to handle low water pressure, with a capacity of up to 80m³/h and with filtration degrees from 80-500 micron
- Includes Amiad's unique suction-scanning cleaning technology
- Operated by the ADI-P electronic controller

ADI-P controller

Amiad's innovative and user-friendly ADI-P electronic controller, which interacts with the ADI-P app, for advanced monitoring capabilities and control functionality.

In addition to Amiad's existing Screen, Disc and Media filtration solutions, this new range is offering customers a more complete package for their irrigation filtration requirements.
