

## Dear Friends at Amiad Water Systems,

In the second half of 2019, you graciously funded a portion of charity: water's work in Bangladesh as a Water Project Sponsor. Lives have been transformed by your generosity! We're honored to share your impact in the following Completion Report.

### **100% of your generous donation funded 1 Water and Sanitation Point.**

Thanks to you, we're one step closer to making sure every person on the planet has access to clean and safe water. Your donation was part of a \$1,500,000 grant that funded 240 projects and brought clean water to 151,752 people!

30% of schools worldwide don't have access to proper sanitation and hygiene. BRAC, our local partner, is bringing these life-changing necessities to children in Bangladesh. Their piped systems draw water from deep tubewells, avoiding shallow aquifers with dangerous contaminants. They are heavily committed to local partnerships, working collaboratively with school staff, children, and parents to ensure continued hygiene education, maintenance, and water testing. The infrastructure and education BRAC has provided to schools, students, and teachers will help students return safely to schools this fall.

As a Water Programs Manager at charity: water, I am honored to oversee our partnership, implementation strategy, and commitments in Bangladesh. I witness the life-changing impact of clean water every day—transformation you empower through your incredible generosity. Clean water brings health to communities once weakened by disease, gives children access to the education they deserve, and restores families' hope in the future through economic empowerment.

Your kindness is rewriting stories for families in Bangladesh. Thank you.

Sincerely,

Stephanie Goetz  
Water Programs Manager, charity: water
