
Dear Amiad Water Systems,

Access to clean water is now a reality for thousands of people in Uganda! On behalf of everyone at charity: water, thank you for your Water Project Sponsorship.

100% of your generous donation funded 1 well with a hand pump.

Your donation was included in the \$2,399,586 granted to Welthungerhilfe (WHH) Uganda, which ultimately funded 279 water projects and served 106,161 people in total.

As you look through the following pages, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to clean water. Some people have waited their entire lives for this moment, and your generosity helped make it possible.

I also want to recognize our local partner, WHH Uganda, whose implementation of water points in the Teso subregion of Uganda has made a big difference — especially for young women and girls. Menstrual health is fundamental to the dignity and wellbeing of women and girls, and an important part of basic hygiene, sanitation, and reproductive health services. It is also a determining factor in whether girls attend school beyond adolescence. At schools in the Teso subregion of Uganda, local communities created separate safe spaces for girls to manage menstruation. As a result, the headteacher of one school told us, "Girls are able to continue attending classes even when in their periods, because water is within the school, the safe space has soap, a new pad and even panadol tablets to give to the girls."

As a Water Programs Senior Manager at charity: water, I am honored to oversee our partnerships, implementation strategies, and commitments in Uganda. I am equally honored to have a front-row seat to the life-changing impact of generosity like yours. Your kindness is rewriting stories for girls in the Teso subregion of Uganda, and I can't say thank you enough.

Sincerely,

Julia Gallus

Water Programs Senior Manager, charity: water
